

COMPLETE OVERHAUL FERRUM CENTRIFUGES

As the original manufacturer our decades of centrifuge know-how are at your disposal. We thus offer optimal advice and support to implement your specific requirements.

Take advantage of our expertise and experience for a complete overhaul of your aging Ferrum centrifuge.

before

after

General overhaul

Components are completely disassembled, cleaned, if required retreated and repainted. The mechanical interior undergoes a general overhaul. Wear parts, piping, cables and sensors are replaced depending on their condition.

The bearings as well as the mechanical control are overhauled in proven manufacturer quality.

Specific customizations and upgrades of the machine can of course be considered.

Every centrifuge we overhaul is equivalent to a new machine in terms of quality and reliability.

« We thank David Koch for high professional competence and responsibility in repairing the pusher centrifuge at the highest qualitative level. JSC Grodno Azot »

Your benefits

SHORT DELIVERY TIME

and 12 month guarantee

KNOW HOW

of the original manufacturer

SAFE OPERATION

thanks to compliance with all maintenance regulations and guidelines

COMPLETE PACKAGE

for a worry- and risk-free overhaul of your centrifuge

SPECIAL TOOLS

available at Ferrum Process Systems

NECESSARY REWORK

of parts can be done in-house

APPLICATION SPECIFIC

customization or installation of further options possible simultaneous to the overhaul

MECHANICAL TEST RUN

on request together with the customer

DETAILED DOCUMENTATION

of all work performed

ORGANIZATION

and on request also disassembly of the centrifuge on site and reassembly after overhaul by Ferrum Process Systems

ONLY A FEW STEPS TO A SUCCESSFUL OVERHAUL

1. Send us your request with suitable dates as early as possible.
2. Ferrum will analyze the request (condition, age, last revision, regularity of maintenance, etc.) and send you an indicative price offer including spare parts and labor hours.
3. Order the overhaul resp. the modification.
4. After delivery of the centrifuge to Ferrum, it is disassembled, cleaned, measured, evaluated and documented for you with photographs.
5. Ferrum will prepare the final offer including spare parts, required labor hours and delivery date.
6. After the work is completed, you can participate in the FAT at Ferrum.
7. The detailed documentation including recommendations for the next revision is prepared and supplied.
8. The centrifuge is delivered and is fully operational after installation.
