Press Release

Ferrum and Riera Nadeu: Strategic Partnership for Scraper and Pusher Centrifuges

Ferrum announces a significant strategic realignment of its product portfolio. With the goal of continuously optimizing its offerings and providing more comprehensive solutions, Ferrum is entering into a close partnership with the company Riera Nadeu.

As part of this cooperation, Riera Nadeu will take over the scraper centrifuge business, which will continue to be marketed and supported under the Ferrum brand.

Starting April 1, 2025, Riera Nadeu will act as the sole point of contact for all matters related to scraper centrifuges, while Ferrum will continue to be responsible for the pusher centrifuge segment. This clear division of responsibilities enables both companies to focus on their respective core competencies and leverage synergies to sustainably expand the product portfolio.

The partnership with Riera Nadeu represents an important step in the further development of Ferrum's business model. This collaboration creates an expanded and more innovative product range, accompanied by optimized technical support and comprehensive service offerings. Customers benefit from the combined expertise of both companies.

Regardless of the respective point of contact, the goal remains to provide efficient and competent support. The expanded product range creates genuine added value, enhancing operational processes sustainably.

Ferrum thanks its customers for their trust and looks forward to continuing to serve as a reliable partner in the future.

"We are excited to welcome the assets of the scrapers business from Ferrum into our family," says Marc Riera, CEO of Riera Nadeu. "This acquisition and our long-term collaboration will enable us to offer even more advanced solutions and consolidate our leadership in the sector."

Ferrum's Executive Chairman, Beat Bühlmann, adds: "We are delighted to collaborate with Riera Nadeu and to integrate the scraper centrifuge business into such a dynamic and innovative entity. This partnership represents a unique opportunity for both companies to grow and thrive together."

For questions or further information, the service teams are always available.
