

ferrum

FERRUM IN SALT PRODUCTION. ZERO DOWNTIME. MAXIMUM TRUST.

For its desalination plant in Czerwionka-Leszczyny, Polish company PGWiR S.A. chose the Ferrum P-50 pusher centrifuge to ensure stable, continuous production of food-grade salt. The result: smooth integration, reliable performance – and a highly satisfied customer.

”

We needed a centrifuge we could count on – and the Ferrum P-50 has delivered. Since commissioning, it has run smoothly and without failure, ensuring uninterrupted salt production. Installation and startup went flawlessly, and the support from Ferrum has been outstanding – both technically and personally. We're extremely satisfied and confidently recommend Ferrum as a reliable partner for advanced separation solutions.
