

OPTIMISING PRODUCTION WITH CENTRISense®

As a long-standing Ferrum customer, we are working hand in hand with their dedicated team to enhance our production process. With the innovative CentriSense® solution, we expect faster cycles, better product quality, and full transparency through data.

”

We've partnered with Ferrum for many years and are currently optimising our process with their new CentriSense® solution. The collaboration with Ferrum's highly motivated and innovative team has been excellent. Once the project is complete, we expect significantly shorter cycle times, gentler handling of the product, improved quality – and complete transparency thanks to real-time process data capture.
