

ON-SITE TEST SUPPORT WITH THE RIGHT EQUIPMENT

To support a chemical company in testing a new approach to waste stream treatment, we provided a centrifuge pilot setup including a perfectly matched feed pump. Our engineers ensured smooth execution and shared key learnings based on the test results.

”

We're a Dutch company testing a solution to wash a waste stream. For an on-site pilot, Ferrum provided a centrifuge and a perfectly matched feed pump. Their engineers supported the test professionally and on schedule. We appreciated the open dialogue, deep technical knowledge, and time they took to explain the results. Ferrum proved to be a reliable supplier of high-quality machinery.
